

# Step 1

- Spin the dial at least two times to the right (clockwise), all the way around. This "clears" the lock of any previous numbers.
- Turn the dial to the right and stop at your first number

## Step 2

- Turn the dial to the left, or counter-clockwise, and pass your second number 1 time. \* You must skip your second number 1 time.
- Stop on your second number!

# Step 3

- Turn the dial to the right, or clockwise towards your third number.
- Once you feel resistance and the lock gets “tight” pull the locker open.
- \*You may have to go past your number slightly until it gets tight – that is ok!
