

Name _____

Name _____

Odd

Even

The Treehouse Game

With a partner, choose to be odd or even. Use a deck of cards with only A(1)-10. Take turns drawing a card from the pile. If the person who is odd, draws an odd number he/she writes that number on the bottom of the tree. If not, the turn is over. Even, writes only even numbers. The person who gets to the top first is the winner.

(Use the symbols on the cards to figure out if a number is odd or even. Do they have partners?)
