

## SQ3R quick reference

**Survey** - In your notes, simply write the title and any subheadings from the lesson. Understand that the "process" of the survey is to pre-read all headings, view photos, read captions, READ the *lesson summary* and all lesson review questions to best prepared for the actual reading.

**Question** - You can either pre-write any questions you might have before reading or write questions as you ARE reading.

**Read** - Of course you MUST read the lesson now! Then, here you can write the answers to the questions you wrote above or take any notes as needed.

**Recite** - Write the vocabulary words from that reading/lesson (not the definitions - you have access to these already).

**Review** - In your own words, write a summary of what you have read.
