

DIRECTIONS FOR USE **SHAKE BEFORE USING.**

Use 1 to 3 squirts whenever it is necessary to reduce foam in tank.

GENERAL INSTRUCTIONS

FOAM FIGHTER is designed to reduce foam in agricultural chemical sprayers and also in dip tanks, such as those used in the grading of peaches and apples.

Foam develops in spray tanks when highly emulsified agricultural chemicals and surfactants are placed in the spray tank during the filling and agitating operation. When the spray tank is more than half full, a large amount of foam can almost fill the balance of the tank. In order to complete the filling operation of the tank, the foam must be removed. This is the time to use FOAM FIGHTER.

STORAGE:

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a safe, well - ventilated area, as cool as possible. Do not store for prolonged periods in direct sunlight. Avoid freezing.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre.
Phone 13 11 26.

Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot.

Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

The use of this material being beyond our control and involving elements of risk to human beings, animals and vegetation, we do not make any warranty, express or implied, as to the effects of such use, when this product is not used in accordance with the directions as stated on this label.
