EXPORTING AS AN IMAGE

You can export a page or all the pages as an image.

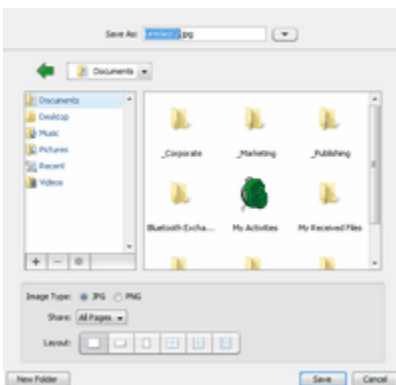

Click the **Publish** button on the toolbar.

Choose **Images** from the menu that appears.

You will see the Image Export dialog.

Use the **Image Type** radio buttons to select JPG or PNG for the export format.

Use the **Share** pull-down [menu](#) to choose the page you want to export. **Choose All Pages** to export the entire project.

You can save multiple pages in one image.

Click the **Layout** button for the number of pages you want in each image.

Type a name for the file in the Save As field.

If you are exporting one image, this will be the name of the image. If you are exporting the entire project, this name will have a number added to it for each page in the project (for example: image01, image02, image03...).

Click the **Save** button.

The page or pages will be exported.
