

## Downloading Software from the Software Center

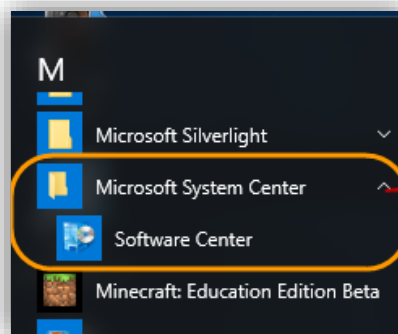

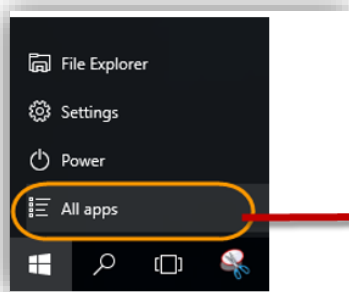

1. Click on the Windows Button

2. Select the Software Center app.

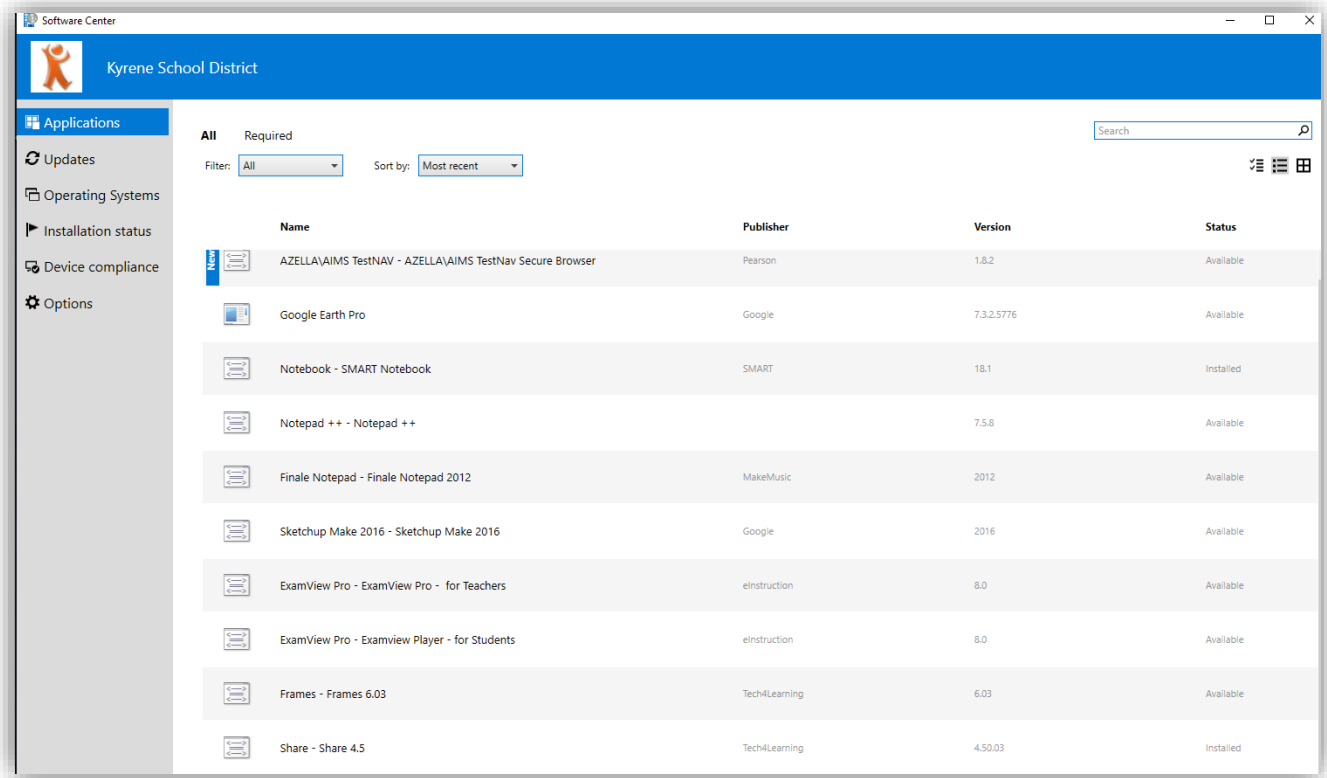

3. If the app is not showing, click on the Windows Button and select All Apps. Use the scroll bar to navigate the list of programs on your computer. Select the down arrow next to the Microsoft System Center app to find the Software Center app.

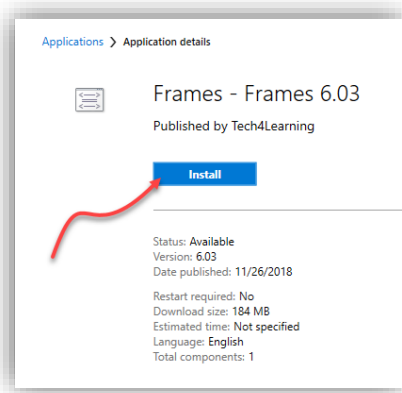

Click here to expand the Microsoft System Center

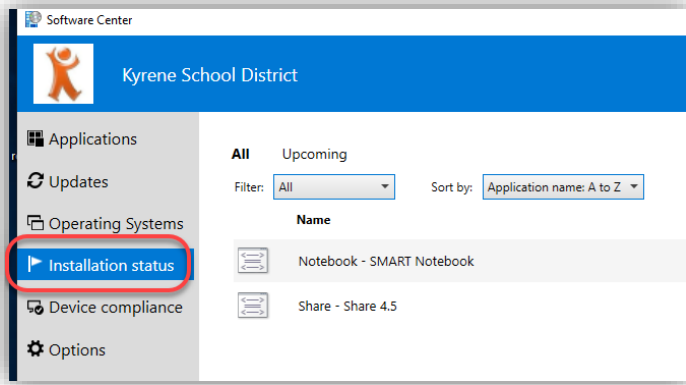

4. A list of available software will appear.

5. Select the software you want then and then select Install.

6. Once the software is installed, the software will appear in the Installation Status tab.

7. You can access the installed software by clicking on the Windows button selecting All Apps. Use the scroll bar to navigate the list of programs on your computer. Select the app to begin using the software.
