Ancient Rome Map

Directions: Follow the directions below to make a map showing the physical features of ancient Rome.

1. Locate, label and draw upside down V’s to represent the Apennine Mountains and the Alps. Color these two mountain ranges brown.

2. Label the Mediterranean Sea, the Adriatic Sea, and the Ionian Sea. Color the seas blue.

3. Locate, draw, and label the Tiber River and the Po River. Color the rivers blue.

4. Locate and label the islands of Corsica, Sardinia, and Sicily. Color the islands yellow.

5. Locate, draw, and label the Tuscan Plain, the Latium Plain, and Campanian Plain. Color the plains green.

6. Color the rest of the Italian coastline orange.

7. Locate and label Northern Africa.

8. Locate, indicate with a dot, and label the cities of Rome, Naples, and Pompeii.

9. Locate, indicate with a triangle, and label the Mount Vesuvius.

10. Locate and label the areas where the Latins, Etruscans, Carthaginians, and Greeks lived.

11. Add the directions north, south, east, and west to the compass rose.

12. Make a map key showing what each symbol and color represents on your map.
