This week we have learned two new Spalding rules:

Rule 12: after *c* we use *ei* (receive). If we say 'a', we use *ei* (vein). In the list of exceptions, we use *ei*. In all other words, the phonogram *ie* is used.

Rule 23: The phonogram *dge* may be used only after a single vowel that says its first sound.

We are also learning about *helping verbs, contractions, and suffixes*. The helping verb **will** is used to show that an action is happening in the future. The contraction **because** connects a sentence that can stand alone (independent clause) with a group of words that cannot stand alone (dependent clause). We have been reviewing rule 9 which states that if you are adding a suffix (that begins with a vowel) to a 1 syllable word that has one vowel followed by a consonant, that you must double the consonant before adding the suffix. Example: red + er = redder
